Programiz
Online Java Compiler

Soal3.java

```java
//Putri Kholiwiyah Siregar (2501081013)
import java.util.Scanner;
public class Soal3 {
  public static void main(String[] args) {
    Scanner input = new Scanner(System.in);
    int Na, Nk;
    int jumlah = 0;
    int count = 0;
    int i;
    System.out.print("Masukkan nilai awal: ");
    Na = input.nextInt();
    System.out.print("Masukkan nilai akhir: ");
    Nk = input.nextInt();
        i = Na;
        do
        {
            if(i % 11 == 0 && i % 2 != 0)
            {
                System.out.println(i);
                jumlah = jumlah + i;
                count = count + 1;
            }
            i++;
        } while(i <= Na);

        System.out.println("Jumlah = " + jumlah);

        if(count != 0) {
            System.out.println("Rata-rata = " + (jumlah / count));
        } else {
            System.out.println("Tidak ada data");
        }
    }
}
```

Output

```
Masukkan nilai awal: 11
Masukkan nilai akhir: 33
11
Jumlah = 11
Rata-rata = 11

=== Code Execution Successful ===
```

soal6.java

```java
//Putri Kholiwiyah Siregar (2501081013)
import java.util.Scanner;
public class soal6 {
  public static void main(String[] args) {
    Scanner input = new Scanner(System.in);
      System.out.print("Masukkan umur: ");
        int umur = input.nextInt();

        if(umur % 10 == 0) {
            System.out.println("Dekade Politeknik Negeri Padang ke " + (umur / 10));
        } else {
            System.out.println("Dies Natalis Politeknik Negeri Padang ke " + umur);
        }
    }
}
```

Output

```
Masukkan umur: 35
Dies Natalis Politeknik Negeri Padang ke 35

=== Code Execution Successful ===
```

7.

Programiz
Online Java Compiler

soal7.java

```java
//Putri Kholiwiyah Siregar (2501081013)
import java.util.Scanner;
public class soal7 {
  public static void main(String[] args) {
    Scanner input = new Scanner(System.in);
      System.out.print("Masukkan jam lembur: ");
        int jam = input.nextInt();
        int upah;

        if(jam > 50)
        {
            jam = 50;
        }
        if(jam <= 20)
        {
            upah = jam * 2000;
        }
        else
        {
            upah = jam * 3000;
        }

        System.out.println("Total upah: Rp " + upah);
    }
}
```

Output

```
Masukkan jam lembur: 50
Total upah: Rp 150000

=== Code Execution Successful ===
```

8.

Programiz
Online Java Compiler

soal8.java

```java
//Putri Kholiwiyah Siregar (2501081013)
import java.util.Scanner;
public class soal8 {
